

SIMCenter Austin

Visualizing sustainable solutions to global and local problems so we make informed choices quicker

The SIMCenter is an immersive visualization facility that fosters global understanding and collaborative problem-solving.

Participants can literally "see" past trends, future projections and compare choices for the future.

The large digital floor displays layered mapping (GIS) that accelerates understanding of global and local trends.

*"How do we make the world work for 100% of humanity in the shortest possible time through spontaneous cooperation without ecological damage or the disadvantage to anyone"
- Buckminster Fuller's World Game™ mission*

Where do we go to grapple with the most challenging issues of our time?

Why Austin?

- a leader in the Sustainable Cities movement and a world leader in clean energy
- University of Texas – with IC², Clean Energy Incubator, Austin Technology Incubator and more
- Technology Hub – high tech companies to participate with the technology required, plus being a hotbed of innovation
- Texas– a national leader of wind energy production in the United States. We do everything bigger!
- Austin leadership in Sustainability can have a global impact

What's Needed? \$8M Funding and Technical Sponsorship
